

ETO-GPT: The privacy-proof AI solution to increase efficiency in your company

GDPR compliant

Own AI instance

Hosting in a German
BSI-certified data center

Multitenancy

What is ETO-GPT?

ETO-GPT is a secure, stand-alone AI platform for companies that work with confidential and sensitive data and want to support internal processes efficiently with AI - without cloud risks or data leaks.

- Complete in-house data control
- Access via web UI or API
- Connection to single sign-on (e.g. Active Directory)

Benefits

- ✓ **Secure hosting in Germany**
BSI-certified German data center - no outsourcing
| no US cloud
- ✓ **100 % GDPR compliant**
Own instance per customer | No data processing by third parties
- ✓ **Easy integration**
Connection to existing authentication structures
(e.g. AD, Entra ID)
- ✓ **Easy to use**
Intuitive user interface | Quick to use
- ✓ **API access**
Automate systems, extract content from documents, fill templates, generate text
- ✓ **Multitenant architecture**
Ideal for corporate structures or IT service providers with several customers

Use Cases

- **Document analysis:** Automatically summarize or check contracts, legal texts, protocols, manuals
- **Template creation:** Generate standard texts, create e-mail templates, develop document templates and automatically fill out internal forms
- **Search support:** Search internal guidelines or documents, e.g. PDF data, and ask questions about them
- **Onboarding assistance:** Optimize the onboarding of new employees or new projects with AI support and design it to meet the needs of individuals

Service & Support

- Training & prompting workshops
- Technical advice on integration
- One-to-one contact person
